

E-MOSION

Elderly friendly MObility Services for Indoor and Outdoor sceNarios

The proposal aims at enabling integral outdoor and indoor localization and mobility services for elderly people with age-related sensory (visual, auditory) and cognitive (memory) impairments that help them in their daily routine activities far from home.

Scenario

APPLICATIONS

E-MOSION applications will be run on mobile devices (smart phones, Tablets, MIDs etc.). Easy-to-use interfaces will ensure easy navigation for elderly users.

Home security

- Sensor network

Public transport

- Live data and planning

Outdoor 3D navigation

- Inertial assisted outdoor navigation

Indoor Store navigation

- Find specific products and assistance

User monitoring

- Basic health functions monitoring
